FEATURES

- Complete buffing pad set with backing pad.
- Turns your corded/cordless drill into high speed polisher.
- Includes: 4 Pads, Backing Plate, and 1/4" Drill Adaptor

PART #: **Q-KIT**

PAD DETAILS

Backup Pad

Features a high-density rubber-backing pad for greater flexibility on uneven surfaces. Super strong hook & loop assures long life and trouble free operation for years. 3" drive with 1/4" shaft fits standard rotary tools. Cordless, electric drills and air tools such as angle die grinders.

Lambs Wool Polishing Pad

Polishes surfaces to their glossiest without causing damage
Made of fine lambs wool.

Foam Pad

Foam is now standard in body shops and high end paint facilities. Our 3" foam pads reach into tight corners with ease. Orange open-cell foam pad for polishing & swirl-removal.

Microfiber Pad

Remove light imperfections and give great shine. Blue soft density foam. Cuts through moderate surface defects without creating further swirls. Foam interface provides optimal cutting efficiency and controlled conformability

Twisted Wool Pad

The most aggressive pad, and a body shop favorite for heavy compounding. These high quality pads have minimum fiber loss and hold up very well under extreme conditions and tight areas up against hard objects.
