

Batteries are not to be disposed of in the normal house waste bin. Every user is legally obliged, to hand over all batteries, irrespective of whether or not they contain harmful substances to a communal collection point in the local town area or to a trade dealer so that they can be disposed of in an orderly environmentally friendly manner. Batteries should be handed over when they are completely discharged.

Technical Specifications

Model	ZT50365
Battery	Li-ion Battery: 2600mAh 3.7V
IP rating	IP 65
Charging time	Approx. 4 hours
Working time*	Approx. 2-3.5 hours

*Working time varies depending on brightness setting and surrounding temperature.

Warranty

Jackco Transnational Inc. warrants this light to the original purchaser against any manufacturing defects in material or workmanship for a period of one (1) year from the original date of purchase. If the defective flood light is determined to be covered under this warranty, it shall be repaired or replaced at manufacturer's discretion without charge, provided that the flood light must be returned with proof of purchase to the dealer and freight prepaid, if returned to the manufacturer. This warranty shall not apply to damage due to drops, accidents, negligent use, and lack of maintenance, abuse, or applications other than the specific function the equipment or tool is designed for.

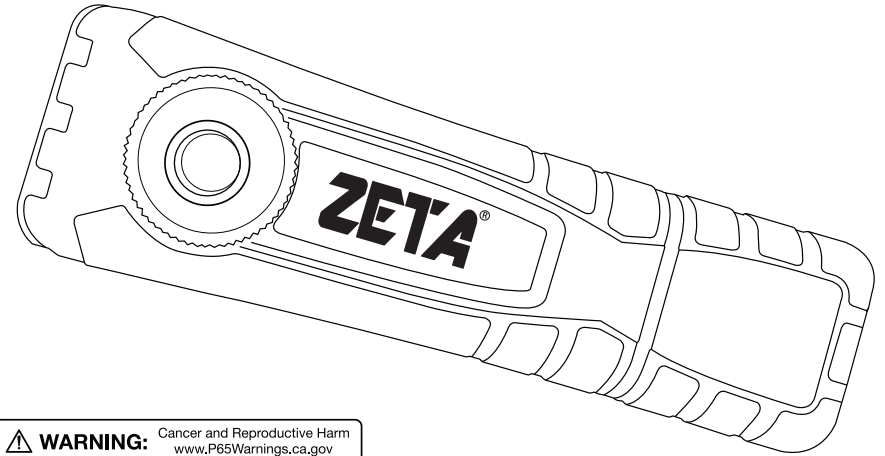

No other warranties, expressed or implied, including those of merchantability or fitness for particular purpose shall be applicable to Jackco except as specifically stated herein. In no event shall Jackco be liable to any party for any special, direct, indirect, consequential, punitive damage of any nature caused by the sale or use of the equipment or tool.

Note: This warranty gives the original purchaser specific legal rights which may vary from state to state

ZT50365 - Color Matching Light

Owners's Manual & Safety Instructions

WARNING: Cancer and Reproductive Harm
www.P65Warnings.ca.gov

Safety Information:

Read all instructions and warnings carefully. Follow all safety precautions to avoid personal injury or property damage during use. Jackco cannot be responsible for damage or injury resulting from unsafe product use, lack of maintenance or incorrect product and/or system operation. Contact Jackco when in doubt as to the safety precautions and operations.

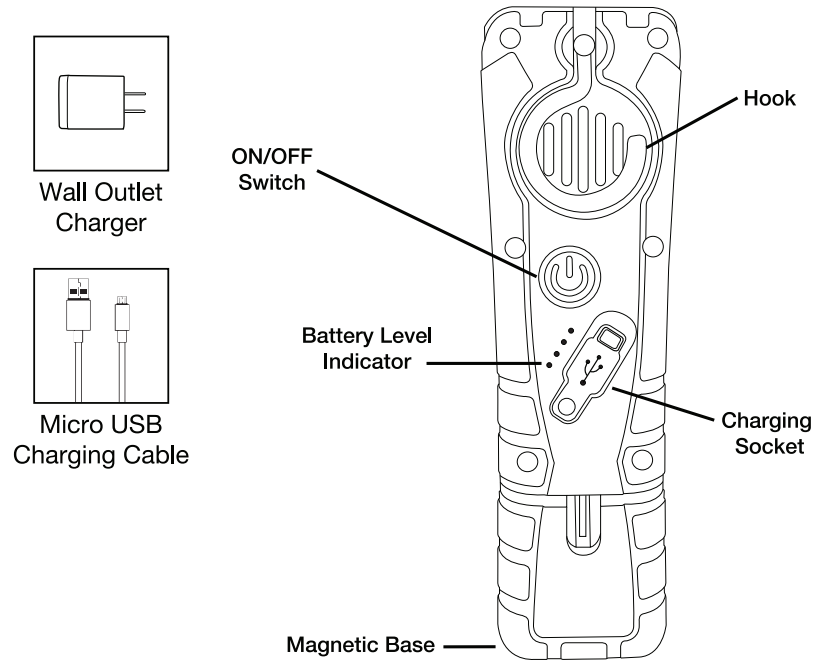

Failure to comply with the following cautions and warnings could cause equipment damage or personal injury and void warranty.

Warning:

This device utilizes a rechargeable lithium battery that can rupture, ignite and cause serious injury if misused. Observe the following safety rules:

- DO NOT place battery and device in fire or high temperature
- DO NOT tamper with battery wiring
- DO NOT puncture or damage battery
- DO NOT immerse or expose battery to water
- DO NOT dispose of the battery in fire or water
- DO NOT stare directly into the flood light
- DO NOT disassemble the battery pack

Product Layout:

Charging the Battery

Plug in the supplied charger to the charging socket on the back of the light. It is recommended to charge the color matching light before first use. Overcharge and discharge protection of the battery will prevent damage to battery. When charge is complete, the lights will remain on, but charging will automatically shut off.

FAQ:

How long will it take to fully charge this flood light?

It will take approximately 4 hours to fully charge this light.

How long will the battery charge remain before recharging?

3 months, however, we suggest that you recharge this color matching light every month.

What is CRI?

This color matching light is perfect for shops when inspecting during the polishing, painting and cleaning process. With a high CRI (Color Rendering Index), you can ensure that this light will reveal the true colors of your project.

Operation Guidance:

To turn on:

- Press power switch one time: 50% brightness
- Press power switch twice: 100% brightness
- Press power switch three times: Top LED Inspection Light

To turn off: Press and hold the power switch until the light is off

Working time with dimmer switch:

1. 100% brightness: ~ 2 hours working time
2. 50% brightness: ~ 3.5 hours working time

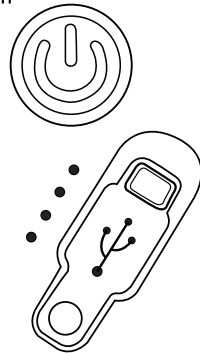

LED battery capacity indicator:

Charging: LED indicator flashes

Fully charged: All 4 indicator LEDs turn on

Note:

There is no memory for the dimmer control, it will start with 50% brightness each time the light is powered on.

Lithium Battery Caring Tips

- This product uses a lithium battery. We recommend that the battery is fully charged and discharged during first three uses to ensure the battery is in its best performance.
- When charging is complete, unplug the wall charger and disconnect the charger.
- Please do not place the color matching light in extreme environments. The light performs best when operating at room temperature, 70° F (20° C).
- Dispose of the light in accordance with the rules and regulations in your locality.

Troubleshooting:

Problem	Solution
No response when pressing the Power button.	<ul style="list-style-type: none">• The battery may be drained, recharge with the supplied charger.
Battery seems to not hold the charge, battery indicator does not light up after you press the switch.	<ul style="list-style-type: none">• If battery is within the 1 year warranty, return to Jackco for inspection and repair. Request RMA at www.jackco.com
